

Accton 智邦科技股份有限公司

安全政策 Security Policy

● 系統化 Systematism

依據 C-TPAT/AEO 做為一項自願性計畫，是建立在貨櫃安全(Container Security)、物理安全(Physical Security)、人事安全(Personnel Security)、程序安全(Procedural Security)、信息技術安全(Information Technology Security)、安全培訓和反恐意識(Security Training & Threat Awareness)、保全系統(Security System)等七方面的基礎上依據 ISO28000 建立供應鏈安全系統。公司將根據這七個方面制定相應的 ISO28000 書面化程序，確保達到或超過這些安全要求。

C-TPAT/AEO are volunteer security programs for supply chains aimed at Container Security, Physical Security, Personnel Security, Procedural Security, Information Technology Security, Security Training, and Threat Awareness. Accton implemented ISO28000 policies that meet or exceed the requirements of these seven security aspects.

● 商業合作夥伴 Commercial partner

做為供應鏈的一個重要環節，我們要求我們的所有供應商（原料提供商、運輸商、碼頭、倉庫等）都必須提供有符合 C-TPAT/AEO 安全要求的聲明。我們將制定對供應安全情況的調查問卷與文件性審核的相關程序，我們的商業合作夥伴必須充分理解供應鏈安全的重要性，並自願符合我們的相關要求。

We require all our suppliers of material goods and intangible service (including transport, port, and warehouse services) to declare their C-TPAT/AEO conformity to make the entire supply chain C-TPAT /AEO compliant. We formulate questionnaires and review relevant procedures on security provision status to ensure our commercial partners remain aware of the importance of supply chain security and conform to our requirements voluntarily.

Moving forward, Accton will continue to leverage worldwide production resources and employ the best possible systems.
